CHEMIQUE ADHESIVES SHOWCASES ITS LATEST RANGE OF AEROSPACE ADHESIVES AT AIRCRAFT INTERIORS EXPO

At this year's Aircraft Interiors Expo, Chemique Adhesives, a leading developer and manufacturer of innovative adhesive products and application equipment, will be showcasing its new Aerotak range of adhesives, all of which have been developed specifically for aerospace applications.

The show will be held at the Hamburg Messe and Congress Centre from 2 – 4 April, and visitors to the Chemique stand – 4UD71 – will have the opportunity to discover for themselves the capabilities and benefits of Aerotak adhesives. Demonstrations of foam-to-foam bonding will be provided throughout the show in an on-stand spray booth.

The Aerotak range includes solvent-based and water-based adhesives that are ideally suited for use in the manufacture of aircraft seat covers and cushions.

The range also includes both flammable and non-flammable formulations suitable for style pad manufacturing and provides a convenient, easy-to-use option for bonding combinations of fabric, leather, foam, e-leather and scrim materials into style pads utilising a hot press stamping method.

Another high-performance product to be showcased on the stand is a foam and fabric adhesive, specifically designed for aircraft seat fabrication, bonding all grades of non-polystyrene foams, including fire-retardant types. This results in a soft glue line, with a strong bond that is extremely versatile.

Products within the Aerotak range meet the stringent flammability certification requirements of CS 25.853(a) Amdt.16 App.F Pt.I(a)(1)(ii) & (b)(4).

Throughout Aircraft Interiors Expo, experts from Chemique will be available on the stand to demonstrate and answer questions about the company's products, to discuss individual requirements, and to provide advice on the selection and use of adhesives for applications in the aerospace sector.

About Chemique Adhesives

Established in 1985, Chemique Adhesives is a UK leading manufacturer of high performance industrial adhesives and adhesive application equipment. Serving a wide range of industries including aerospace, automotive, commercial manufacturing, composites, construction, furniture, marine and transportation, Chemique is able to offer specialist bonding solutions to a multitude of applications whilst providing the highest level of service, support and advice. The company's manufacturing and service procedures comply with ISO 9001:2008 ensuring that all products are always tested and manufactured to the highest standard, providing customers with a quality adhesive that they can rely on time after time.
