## Aircraft Seating Adhesives

Aerotak CAS 201FR adhesive has been a well-established formula in the aircraft interiors industry for over 30 years and is internationally recognised by many airlines as a leading product for use in the manufacture of aircraft seat covers.

This non-flammable, sprayable adhesive is suitable for style pad manufacturing and provides a convenient, versatile option for bonding combinations of fabric, leather, foam, e-leather and scrim materials into style pads, utilising a hot press stamping method.

CAS 201FR meets the stringent flammability certification requirements of:  
CS 25.853(a) Amdt.27 App.F Pt.I(a)(1)(ii) & (b)(4).

### Aerotak Features

- ✓ **Permanent Bond**
- ✓ **Compliant with CS 25.853(a) Flammability Testing**
- ✓ **Long Open Time**
- ✓ **Established Seat Cover Formula for Over 30 Years**

### CAS201FR One-Component Adhesive

Specifically developed for style pad manufacturing, CAS 201FR is a one component sprayable adhesive which exhibits a soft glue line and creates a strong, resilient bond.

- Well-Established Formula Used by Leading Airlines
- Non-Flammable
- Easy to Apply Sprayable Adhesive

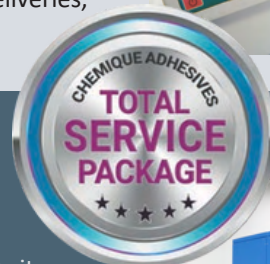

# TOTAL SERVICE PACKAGE

**Aerotak<sup>®</sup>**  
Aircraft Seating Adhesives

We've got your adhesive requirements covered from start to finish.

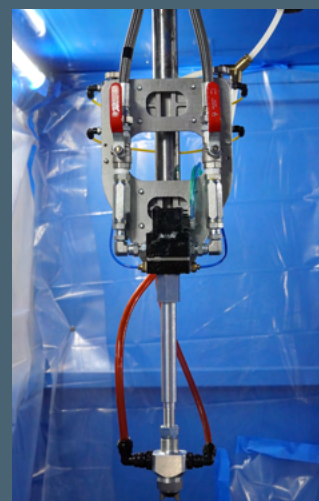

For over three decades we have provided Chemique's Total Service Package and this ensures that you receive the **right product**, the **right application** and the **right service**.

We can assess your entire operation and provide a complete solution that includes personalised designs, equipment recommendations, regular adhesive deliveries, performance checks, maintenance services, training and ongoing support.

## Our Total Service Package\* includes:

-  **Tailor-Made Adhesive Solutions**  
Chemique works closely with customers to provide formulations that suit their particular needs.
-  **Rigorous Quality Control**  
The company's manufacturing and service procedures comply with ISO 9001 quality standards, providing peace of mind that all of our adhesives meet exact technical specifications.
-  **Full Engineering & Technical Support**  
Our fully trained staff offer on-going technical support as well as:
  - Advice on improving the production process
  - Pre-delivery adhesive and equipment testing
  - Installation of new equipment
  - Servicing of pumps, spray guns and other equipment
  - Engineering call-outs and servicing contracts
-  **Product Demonstrations & Samples**  
We offer adhesive demos and samples so that customers can be sure that the product meets all of their requirements before ordering.
-  **Comprehensive Training**  
Full training can be provided on our products and application equipment, providing peace of mind for the customer.
-  **Full Range of Accessories**  
A range of solvents are available, along with stock of spare parts and accessories for all standard application equipment.
-  **After Sales Support & Advice**  
We provide full after sales support to ensure that all products and equipment are working to specification.
