 **Chemique
Adhesives**

The Bondseal aerosol range includes a variety of spray contact adhesives and removers. They are more environmentally conscious aerosols that use ozone friendly propellants to provide a clean and versatile bonding solution, without sacrificing the excellent instant grab properties.

For controlled and efficient application without the risk of overspray, the aerosols are designed with adjustable spray nozzles that give a choice of fan widths and direction, with a web spray pattern. The range was developed with high bond strength suitable for bonding foam, bedding, office seating and furniture, as well as many substrates including wood, plastics, glass, metals, insulation, fabric, cardboard, paper and more!

Available Products

Bondseal 2080

A truly do-it-all, multi-purpose spray contact adhesive that works on a wide range of substrates. Our best-selling high performance spray is a versatile adhesive, with a high solids content.

Bondseal 2090

A synthetic rubber based aerosol adhesive. Heavy duty yet efficient and versatile bonding solution. Suitable for applications that require PROP65 and CARB compliance.

Bondseal Ultimate

The ultimate high strength spray adhesive, with excellent grab and low-solvents. Provides stronger and more aggressive results with high temperature resistance, suitable for headliner applications.

- ✓ Low Odor
- ✓ Easy to Use Spray Application
- ✓ Multiple Fan Widths
- ✓ Adjustable Nozzle
- ✓ Instant Grab Contact
- ✓ Bonds a Wide Range of Substrates

Spray Adhesives & Removers

Available Products

Bondseal Silicone Lubricant

A clear, non-staining silicone-based lubricant with a fast drying formula. Perfect for textile and foam processing machines as it puts slip where you want it, with excellent high temperature stability.

The multi-use formula treats metals, lubricates tools and puts shine back on vehicle dashboards and door panels. It deposits a film onto protective clothing, making them rain and shower proof and may be used as a general purpose polish.

Bondseal Adhesive Remover

Its powerful action breaks down adhesives and dissolves them into a solution which can be easily wiped away. As it mixes readily with most organic materials, it is ideal for removing spillages where adhesive, grease or oil base products are part of the liquid spilt.

Ideal for use on hard surfaces such as metal, paintwork, glass, rubber, and most plastics; and soft surfaces such as carpets, curtains, blinds, etc. It is also excellent for cleaning canister adhesive hoses and guns prior to re-use.

Bondseal Citrus Cleaner

Formulated as an aggressive, yet biodegradable industrial citrus cleaner and adhesive remover. The aerosol and canister delivery system allows for even and controlled application. It can be used on almost all surfaces and substrates, including fabrics, painted surfaces, glass, porcelain and concrete, and leaves no oily residue.

TOTAL SERVICE PACKAGE

Bondseal
Spray Adhesives & Removers

We've got your adhesive requirements covered from start to finish.

For over three decades we have provided Chemique's Total Service Package and this ensures that you receive the **right product**, the **right application** and the **right service**.

We can assess your entire operation and provide a complete solution that includes personalised designs, equipment recommendations, regular adhesive deliveries, performance checks, maintenance services, training and ongoing support.

Our Total Service Package* includes:

Tailor-Made Adhesive Solutions

Chemique works closely with customers to provide formulations that suit their particular needs.

Rigorous Quality Control

The company's manufacturing and service procedures comply with ISO 9001 quality standards, providing peace of mind that all of our adhesives meet exact technical specifications.

Full Engineering & Technical Support

Our fully trained staff offer on-going technical support as well as:

- Advice on improving the production process
- Pre-delivery adhesive and equipment testing
- Installation of new equipment
- Servicing of pumps, spray guns and other equipment
- Engineering call-outs and servicing contracts

Product Demonstrations & Samples

We offer adhesive demos and samples so that customers can be sure that the product meets all of their requirements before ordering.

Comprehensive Training

Full training can be provided on our products and application equipment, providing peace of mind for the customer.

Full Range of Accessories

A range of solvents are available, along with stock of spare parts and accessories for all standard application equipment.

After Sales Support & Advice

We provide full after sales support to ensure that all products and equipment are working to specification.
