

Why Buy From Us?

Value For Money

In reality, we all want the best for our money and Chemique's streamlined manufacturing and procurement allow us to offer great products at a competitive and realistic price.

Quality Control

We perform a multitude of tests to ensure that all of our products are manufactured to the highest quality and comply with ISO 9001 standards. This provides peace of mind that our adhesives consistently meet your exact technical specifications.

Tailor Made Solutions

We can provide formulations to suit particular needs and our experienced chemists and engineers are on hand to provide new solutions to suit any adhesive and application requirement.

Technical Knowledge

Our specialist technical knowledge means that we can stay at the forefront of adhesive development, providing our customers with new and pioneering solutions across many market sectors.

Experience

With nearly 40 years of experience in adhesives manufacturing, we've developed a business with a solid foundation and always strive to offer the best level of service, support and advice.

Testing

We have the combined know-how and experience of analysing adhesives for a wide range of applications. Our advanced equipment allows our team to carry out multiple test methods and evaluate many adhesive properties.

Adhesive Performance

Here at Chemique, we're continually developing ways to enhance the technical characteristics of our adhesives, to improve the performance and quality, as well as providing the very best value for the customer.

Environment

Our continued research and development for environmentally friendly adhesives ensures that we are at the forefront of adhesive technology, whilst also meeting the stringent requirements of ISO 14001 environment standards.

After Sales Support

Our commitment to your satisfaction does not end when your order leaves our premises, as all customers receive our unique service and support package. We're always on hand to answer any questions, offer technical advice or engineering support, whenever needed.
